piezo diffuser duo

## Lifestyle transformation, with two different scents and a transparent form

"duo" is a new type of aroma diffuser that manages two blends.

Whether morning or night, living room or bedside, spending time with friends and family, or relaxing alone, match your favorite scent with the scene or mood.

Without using heat or water, the transparent design allows you to witness the diffusion of 100% natural aroma oil as it gently spreads throughout your room.

## About

### 1. Diffuse two different scents

Two aroma bottles can be set to diffuse based on a timer setting. This is a new type of aroma diffuser that enables us to enjoy scents more freely, matching the scene and mood of our everyday life.

### 2. Design

The appearance accents modern interior design, and shows current oil levels to help monitor consumption.

### 3. Piezo

Utilizing piezo spraying method, with ultrasonic vibrations, this device atomizes the aroma oil. Compared with other methods, the scent spreads quickly throughout the space and is completely silent.

### 4. Aroma oil

@aroma's oil is 100% pure natural. All products carry the unique power of their original material. The "duo" diffuser is a piezo type, thus there is no deterioration of the scent by heat. Enjoy the aroma as it was designed.

# piezo diffuser aroma oil

Our aroma oils are blended by our designers to improve functions and benefits from 100% natural essential oils extracted from flowers, leaves, trees, and fruits. Piezo diffuser aroma oil (100ml) is designed for @aroma's piezo diffusers to ensure the perfect diffusion.

## Botanical air

The simple power of plant-derived scents

**B 01** ORANGE GRAPEFRUIT
